```
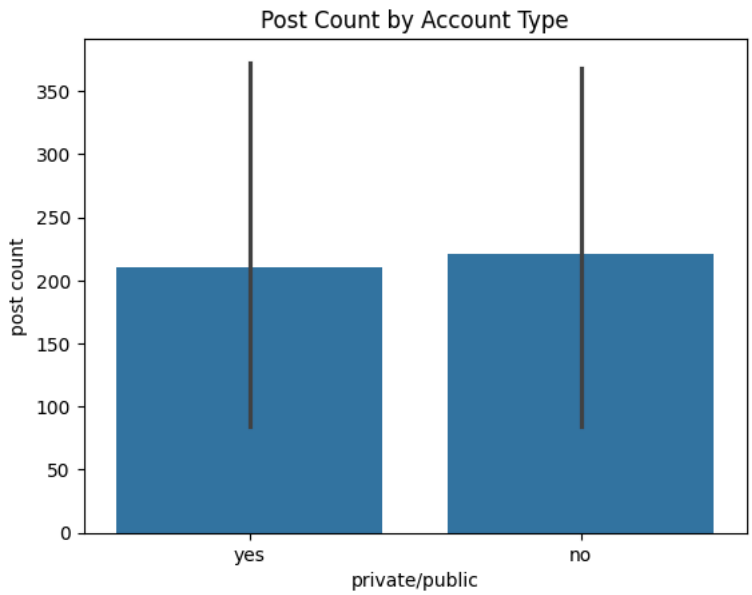
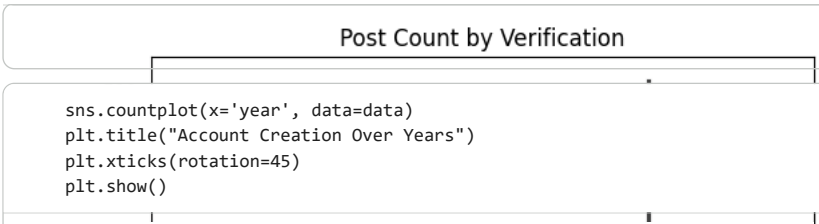
import seaborn as sns
import matplotlib.pyplot as plt

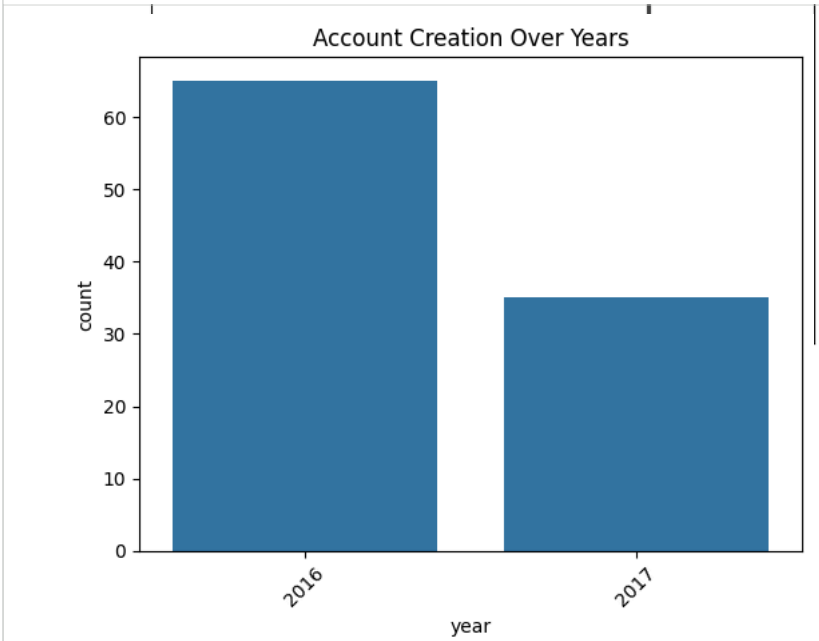
sns.barplot(x='private/public', y='post count', data=data)
plt.title("Post Count by Account Type")
plt.show()
```



```
sns.barplot(x='Verified status', y='post count', data=data)
plt.title("Post Count by Verification")
plt.show()
```



```
sns.countplot(x='year', data=data)
plt.title("Account Creation Over Years")
plt.xticks(rotation=45)
plt.show()
```



Insights:

Public accounts tend to have higher post activity

Verified accounts show higher engagement signals (post count)

Most accounts were created in recent years

Active users tend to post more frequently

**Recommendations **

Focus on public accounts for better reach

Collaborate with verified users for brand trust

Encourage frequent posting to increase visibility

Target newer active accounts for growth campaigns

Maintain consistent content strategy
